ESCALATION PATTERN: MONTH STRIKES ON THE 4TH TARGET TYPE: 4 JUN - 22 OCT

All documented incidents of escalation on a single calendar month, 4 June - 22 October 2026. Source: Saudi Press Agency, Civil Defense, Ministry of Defense, Houthi-run media. Houthi-run media figures are unverified and may be inflated. Full incident log in the Report Deep Dives section.

SO WHAT

The campaign has climbed an escalation ladder: from military targets to economic targets (Aramco, Yanbu), then to civilian targets (Riyadh, Dammam, Jeddah), and now to international shipping (Bab al-Mandab, Red Sea). Each step has landed. Abqaiq shut Aramco output for two weeks; Riyadh was halted for 13 days; U.S. 5th Fleet in Manama has closed 3 waterlines. On the evening of 7 Oct, CENTCOM's airframe alert on Dammam's King Fahd International Airport. Each step raises the reputational cost to the Kingdom more than the military gain.

7 What the numbers are, and are not.

Airport figures read directly off Flightradar24's live departures board, which is fed by radar and ADS-B. Takeoffs and landings are counted from the Flightradar24 flight-status feed. Flightradar24 is an unofficial aggregator, not a CAGA or airport authority. Treat it as a near-real-time proxy, not a ledger.

Halts are computed as per-airport clock deltas, any gap of 30 minutes or more with no takeoff or landing. Dammam's 66-minute halt on 11 Oct is the longest in the 24-hour window. Riyadh's halt since 9:29 PM Sunday is still open at the time of this report.

Cancellations are counted from airport boards, not from a source. Economy data are lagged. Prioritised by 4 to 7 days, 2021 exports by source and destination, Saudi Arabia's share by several business days. Brent futures are live, front-month settle.

Confidence tags: CONFIRMED = official statement, multi-source, or directly observable. CORROBORATED = multiple independent reports agree. UNCONFIRMED = single source, not yet verified. DISPUTED = sources conflict. Each claim in the Report Deep Dives carries one.
