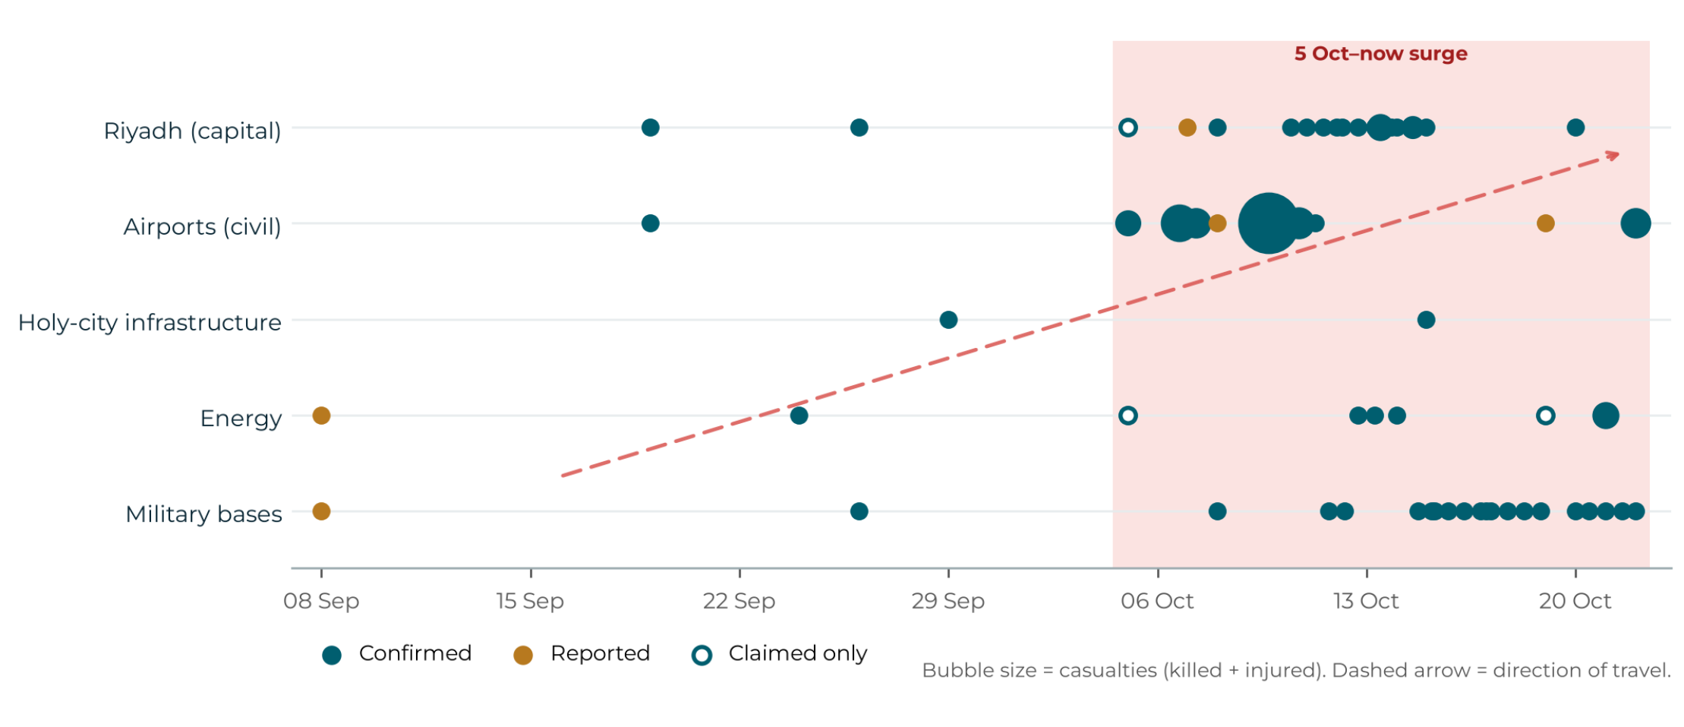
ESCALATION PATTERN: HOUTHI STRIKES ON KSA BY TARGET TYPE, 8 SEP – 22 OCT



60 sourced events since 8 September (52 confirmed). Latest: Coalition: four drones intercepted and destroyed over the Eastern Region; targets and casualties not stated (22 Oct, Coalition spokesman (@CJFCSpox) / SPA; none reported). Each event has a source link in strikes.json and on the website. Filled = confirmed officially; amber = reported by credible media; hollow = claimed only (Houthi or unattributed). Events without a source are not plotted.

SO WHAT

The campaign has climbed an escalation ladder: from military targets to economic targets (Aramco, Yanbu), then to symbolic targets (the Madinah power station serving the Prophet's Mosque), and now to civilian aviation and the capital. King Khalid International Airport has been hit or targeted on 19 Sep, 5, 7, 8, 10 and 11 Oct; the 10–11 Oct strikes closed it indefinitely. On the evening of 11 Oct GACA confirmed a further attack on Dammam's King Fahd International Airport. Each rung raises the reputational cost to the Kingdom more than the military cost.

ATTACKS, INTERCEPTIONS & ALERTS (KSA-WIDE)

2 Every attack, interception, Civil Defense alert and all-clear, debris fall and casualty report since 6:00 AM.

Sources: Coalition spokesman, SPA, Civil Defense, Interior and Energy ministries, Al Ekhbariya, Reuters/AP. Riyadh time.

No new attacks, interceptions or alerts since 6:00 AM AST.

Last 24 hours: Attacks 1, interceptions 3.

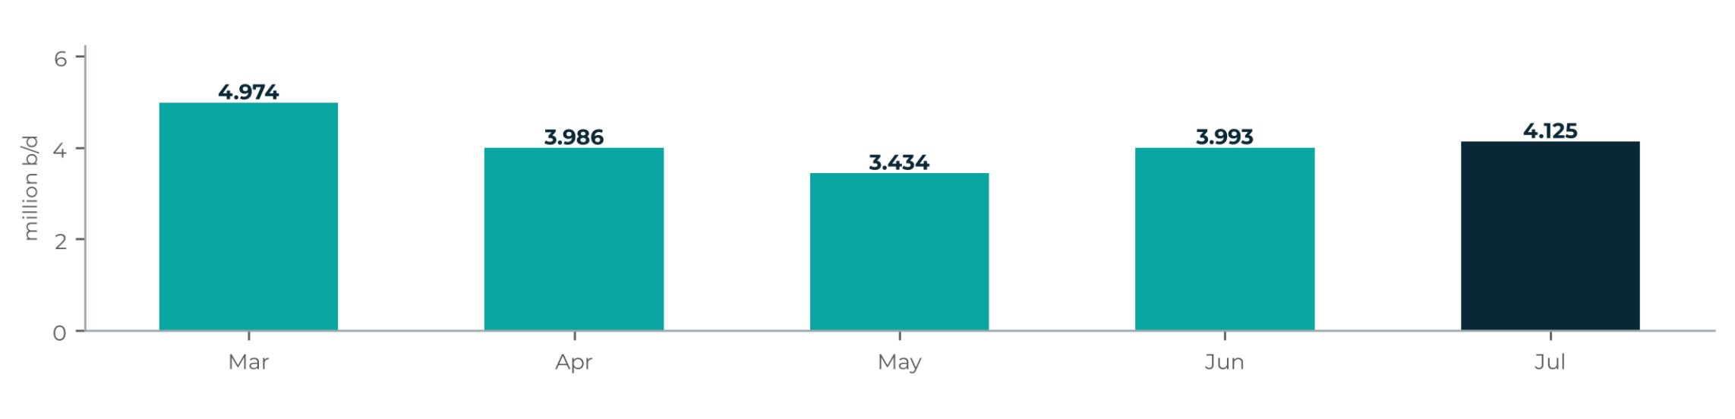
Red Sea = Bab el-Mandeb (southern entrance) and Suez Canal (northern exit).*

SAUDI CRUDE OIL EXPORTS, JODI MONTHLY AVERAGE (MILLION BARRELS PER DAY)



Monthly, lagged about two months. Saudi Arabia does not publish daily export figures and no free daily series exists; JODI is the finest official data. Latest month: July 2026, 4.12 million b/d. Daily cargo-level estimates need a paid tanker-tracking feed (Kpler, Vortexa).

METHOD AND LIMITS

7 What the numbers are, and are not.

- Airport figures (last takeoff and landing, counts, cancellations, diversions, charts, halts) come from the Flightradar24 RUH and DMM boards fetched at 8:50 AM, all pages for the local day. Flightradar24 is an unofficial aggregator, not a GACA or airport feed, and actual times can lag by a few minutes.
- Halts are computed per airport from the boards: any gap of 45 minutes or more with no takeoff or landing. Dammam's status level is set automatically (halted if a halt is open; disrupted if 8%+ cancelled, 3+ diversions or a halt in the last 6 hours) unless set by hand.
- Escalation events come from strikes.json; each has a source link. Economy data are lagged: PortWatch by 4 to 7 days, JODI exports by about two months, EIA spot Brent by several business days; the Brent futures quote is near real time.
- Confidence tags: CONFIRMED = official statement made, or directly checked; CORROBORATED = multiple independent reports consistent with board data; UNVERIFIED = single or social reports not confirmed officially. Claims are attributed to their source.
