METHOD AND LIMITS

5 What the numbers are, and are not.

• Board figures (last takeoff and landing, counts, cancellations, diversions, Gulf routes, chart) come from the Flightradar24 RUH boards fetched at 9:48 AM, all pages for the local day. Flightradar24 is an unofficial aggregator, not a GACA or Riyadh Airports board, and actual times can lag by a few minutes.

• The headline cancellation figure is the board count. Flightradar24's stats panel lags it by a few flights. Delayed, on-time, average-delay and index figures are the panel's own.

• Confidence tags: CONFIRMED = official statement made, or directly checked; CORROBORATED = multiple independent reports consistent with board data; UNVERIFIED = single or social reports not confirmed officially. Claims are attributed to their source.
