HEADLINE
Airport halted since 8:10 PM, 290 minutes — no takeoff or landing since XY278 at 8:10 PM; no takeoff since XY277 at 1:39 PM; GACA 12:46 AM: 12 dead, 309 injured; NOTAM A3586/26 still suspends ops through Sunday 2100 UTC; 499 flights cancelled today so far.

There were 0 takeoffs in the last hour, the latest XY277 to Sharm el-Sheikh at 1:39 PM. The latest landing was XY278 from Sharm el-Sheikh at 8:10 PM, with 0 landings in the last hour. 499 flights are cancelled today (243 departures, 256 arrivals) and 1 arrivals have diverted. **Yesterday, 9 October:** 166 of 703 flights cancelled, 18 arrivals diverted and four halts of 45+ minutes, the longest 7:41 to 9:38 PM (no landing until 9:45 PM). No official reason has been given for the evening stop. **Saturday mornings:** a 91-minute halt ran from 6:37 to 8:08 AM with no takeoff or landing. **Saturday afternoon-evening:** the board showed no takeoff or landing from 2:05 PM until flynas XY278 from Sharm el-Sheikh landed at 8:10 PM (~365 minutes). Since that landing there has been no further takeoff or landing — open halt since 8:10 PM (290 minutes at the 1:00 AM Sunday slot). Last takeoff remains flynas XY277 at 1:39 PM; prior last landing before XY278 was Air Cairo SM461 at 2:05 PM. GACA confirms King Khalid International Airport was attacked on Saturday afternoon and operations remain temporarily suspended until damage assessment and facility safety checks are complete. GACA follow-up statement at 12:46 AM Sunday (dated 11 October): the attack resulted in 12 fatalities — 4 Saudi citizens and residents of Bangladeshi (2), American (1), Egyptian (1), Jordanian (1), Syrian (1), Palestinian (1) and Sudanese (1) nationality — and 309 injured, including some in critical condition; property damage is being assessed. AIS/NOTAC shows NOTAM A3586/26 (NOTAMR) keeping the aerodrome unavailable from 10 Oct 19:24 UTC through 11 Oct 21:00 UTC. Flightradar24 at 11:35 PM reported Dammam-bound flights holding (including one originally for Riyadh); at 12:01 AM FR24 said flights were on approach to Dammam again. Reuters at 9:40 PM had restated the suspension with "several" wounded — GACA's 12:46 AM tally supersedes that on casualties. AP reports an official saying a missile struck a passenger terminal and wounded many; AFP hospital source earlier said dozens injured / at least five Saudis in ICU; AFP diplomatic source said Houthis hit with a missile around 3:00 PM. Social media death-toll claims circulating earlier remain unverified against the new official GACA figures. No Houthi claim for Saturday found yet. Passengers told to confirm flight status before heading to the airport. Board cancellations remain elevated on Sunday 11 October. Dammam (disrupted): 8 takeoffs and 5 landings in the last hour; 41 flights cancelled today (16%), 0 arrivals diverted.

20 sourced events since 8 September (14 confirmed). Latest: Coalition Houthi ballistic missile intercepted and destroyed in Al-Kharj province (11 Oct, [Coalition spokesman / SPA](#)). Each event has a source link in strikes.json and on the website. Filled = confirmed officially; amber = reported by credible media; hollow = claimed only (Houthi or unattributed). Events without a source are not plotted.

SO WHAT

The campaign has climbed an escalation ladder: from military targets to economic targets (Aramco, Yanbu), then to symbolic targets (the Madinah power station serving the Prophet's Mosque), and now to civilian aviation and the capital. King Khalid International Airport has now been hit or targeted on 19 Sep, 5, 7, 8 and 10 Oct; the 10 Oct strike closed it indefinitely, and a projectile fell near Dammam's airport the same evening. Each rung raises the reputational cost to the Kingdom more than the military cost.

2 Airport halted since 8:10 PM, 290 minutes; GACA 12:46 AM: 12 dead, 309 injured; NOTAM A3586/26 still AD NOT AVBL through Sunday 2100 UTC; FR24 Dammam approaches resumed; XY278 still only post-2:05 PM RUH movement.

6 METHOD AND LIMITS What the numbers are, and are not.

Airport figures (last takeoff and landing, counts, cancellations, diversions, charts, halts) come from the Flightradar24 RUH and DMM boards fetched at 1:53 AM, all pages for the local day. Flightradar24 is an unofficial aggregator, not a GACA or airport feed, and actual times can lag by a few minutes.

Halts are computed per airport from the boards: any gap of 45 minutes or more with no takeoff or landing. Dammam's status level is set automatically (halted if a halt is open; disrupted if 8%+ cancelled, 3+ diversions or a halt in the last 6 hours) unless set by hand.

Escalation events come from strikes.json; each has a source link. Economy data are lagged; PortWatch by 4 to 7 days, JODI exports by about two months, EIA spot Brent by several business days; the Brent futures quote is near real time.

Confidence tags: CONFIRMED = official statement made, or directly checked; CORROBORATED = multiple independent reports consistent with board data; UNVERIFIED = single or social reports not confirmed officially. Claims are attributed to their source.
